## 14<sup>th</sup> C3G/DDD Family Conference

October 3-5, 2019 • University of Iowa

The University of Iowa Molecular Otolaryngology & Renal Research Laboratories and Kidneeds announce the **14th C3G/DDD Family Conference** to be held at the University of Iowa on **Oct. 3-5, 2019**. This collaborative effort will bring you the latest medical updates regarding C3GN and DDD. There are no costs to attend this conference or any of the meals associated with the conference.

To accommodate as many patients as possible Drs Nester and Smith will once again open the Rare Renal Clinic for patients attending the conference for the day and a half before the conference. Starting at noon on Thursday, October 3, 2019 and continuing through Friday, October 4, 2019, there will be a limited number of formal appointments for patients to be seen in the Rare Renal Clinic. If you are interested in a formal appointment with Drs Nester and Smith during this special Rare Renal Clinic, please contact Monica Hall at [monica-hall@uiowa.edu](mailto:monica-hall@uiowa.edu). She will work with you to schedule an appointment and to obtain the necessary clinical material prior to your visit. Because this appointment is scheduled through the hospital, the University of Iowa Hospitals and Clinic will bill you for this visit and therefore insurance clearance must be obtained in advance of the appointment.

The weekend offers an opportunity for patients and families living with C3GN/DDD to share common experiences and to learn about the latest developments to impact C3GN/DDD. On the evening of Friday, October 4<sup>th</sup>, there will be a Welcome Dinner for all conference attendees at a local restaurant. Members of the MORL and University of Iowa staff will also attend.

On Saturday, October 5th, the C3G clinician and research teams at the University of Iowa, plus experts outside the University, will provide an entire day of C3GN/DDD medical, drug and research information. You will learn about the latest advances over the past year, including treatment options, transplant plans and much more. The conference will conclude with breakout sessions where persons living with C3G and their family members can share stories and offer experiences about life with C3GN/DDD. On Saturday evening, all attendees are invited to a family-style dinner at the Smith's home.

We have secured a room block at the Graduate Iowa City hotel in downtown Iowa City again this year. We will also work with the Graduate Iowa City to arrange a shuttle service to and from the conference to cut down on attendees' parking expenses at the conference.

### Graduate Iowa City

210 South Street  
Iowa City, IA 5224
